Dr. Phillip Olla is a Professor of Management Information Systems, and the Director for the center of Research at Madonna University. His primary focus area is the convergence of telecommunication and healthcare innovations.

This project was an impact study of the health and economic costs of pollution in Southwest Detroit. The main objective of the study was to apply existing knowledge and evidence about health impacts in Southwest Detroit to specific social and community contexts.

The REI Network develops and identifies innovative economic development tools, models, policies and practices in support of innovative economic development strategies with promise to yield high-growth entrepreneurship and job creation in distressed regions throughout Michigan.

This webinar is supported in part pursuant to the receipt of financial assistance and support from the United States Department of Commerce Economic Development Administration. The statements, findings, conclusions and recommendations are solely those of the authors and publishers and do not necessarily reflect the views of any federal agency or Michigan State University.
